are you a fan of Pokémon? If you are, then you may want to learn more about the many different types of Pokémon and how they work, and perhaps even use a little creativity to make your own. With Pokédex 3D Pro, you can learn even more about Pokémon and their special abilities, and you can also make a bit of extra cash by completing an entire Pokédex. Let's start with how you'll be able to learn more about Pokémon.

First, Pokédex 3D Pro will let you learn about the different types of Pokémon. In the main screen, you'll get to see the Pokémon types and what each type can do. When you tap a Pokémon, you can see its attack strength, its type, and which abilities it has, and it can even give you hints on how to catch it. It's also possible to see what attacks your Pokémon will learn if you use it in battle against another Pokémon. You can also have a little fun by tapping on different Pokémon types to see what you can do with them. For

example, you can see that Water Pokémon have access to the ability Thunder, which lets you shoot a water wave out of your Poké Ball, causing damage to an enemy or even to the ground. You can also use the Water Pokémon's Aqua Jet in the air, and you can use it with the Grass-type Pokémon to cause a giant wave to come towards an enemy, or you can use it with a Fire-type Pokémon to help you get a boost in battle. You can also learn what each Pokémon type's special abilities are by tapping on the Ability icon, which is the

third button from the top of the screen. The abilities, which are shown in icons, range from psychic to leech seed, and they can help you survive in the wild and help you find Pokémon. A Pokédex 3D Pro owner who has caught lots of Pokémon may be able to see a wild Pokémon with a special ability in a special place. For example, you might see the ability Detect if you're in an area that's good for catching Pokémon. You can tap on it to get an explanation of that ability, and it might even tell you where to find Pokémon. Each

Pokédex 3D Pro trainer is expected to get a Pokédex of their own, and you can do that by tapping on the "Pokédex"
